

NIPPON ANTENNA

# UDF80 UHF Thin Type Antenna

**UDF**  
UHF DIGITAL FLAT ANTENNA

The Thin Type Digital Antenna is the best for receiving Terrestrial Digital signals

The 2008 Good Design Prize (G-Mark) from the Japanese Industrial Design Promotion Organization was awarded to the UDF80 Terrestrial Digital Antenna.

UDF80 was developed to receive the Terrestrial Digital Broadcasting Signal with a simple design and thin casing for easy outdoor installation on the roof, wall or veranda free from weather-related problems, such as strong winds and heavy snow. The flexible installation methods for both indoor and outdoor mounting is easy for the user and the cosmetic design matches with any type of housing or building.

## Easy installation

Easy to install with Thin and Light design

### Mast installation\*

\*Mast sold separately

## Long lasting design against:

Salt damage / Lightning damage / Bird droppings

## Saves time in installation

Total installation in less than a day

### Veranda installation\*

\*Installation kit sold separately

## For Mid/Strong signal

- High sensitivity design
- Receiving both Horizontal and Vertical polarization signals
- Outer casing is formed with weather protected resin
- JEITA DH mark registered (Japan Electronics and Information Technology Industries Association)
